Interregional Training Course on Safety Assessment for Radioactive Waste Management Facilities

Hosted by

The Government of Namibia

through the

Ministry of Health and Social Services; Atomic Energy & Radiation Protection Authority

Windhoek, Namibia

10 June 2019 – 14 June 2019

Ref. No.: TN-INT9182-1807109

Information Sheet

Purpose

The purpose of the event is to train new staff on assessing the safety of radioactive waste management facilities.

Working Language(s)

The working language(s) of the event will be English.

Deadline for Nominations

Nominations received after 15 March 2019 will not be considered.
**Scope and Nature**

The principal outputs from the event will be better trained new staff and an improved project-wide understanding of safety assessment for radioactive waste management facilities. The event will train new staff from Member States participating in project INT9182. The scope of the event will include safety cases for predisposal management facilities (e.g. for waste conditioning and storage) and for disposal facilities. The training course will discuss the aims and objectives of safety assessment, safety assessment approaches, the technical basis for safety assessment calculations and examples of safety assessments for radioactive waste management facilities, particularly those considering facilities for the management of disused sealed radioactive sources (DSRS).

**Participation**

The event is open to 65 participants from Member States. Participants should comply with the profile described in Participants' Qualifications. The event is open to two applicants per participating country. When sending applications, Member States are expected to specify clearly the priority of their applicants.

**Participants’ Qualifications and Experience**

Participants should be new staff with no more than approximately five years in their posts requiring further education experience in radioactive waste management. Participants may be from waste management operators, regulatory bodies, technical support organizations or other organizations conducting research in support of safety assessments for radioactive waste management. Participants will be expected to have a reasonable grounding in mathematics and the physical and environmental sciences, and at least a basic understanding of radioactivity.
Application Procedure

Candidates wishing to apply for this event should follow the steps below:

1. Access the IAEA TALEO page (https://iaea.taleo.net/careersection/ex/jobsearch.ftl) and complete the Candidate Profile.

2. Be registered on the Nucleus page of the IAEA (https://nucleus.iaea.org/).

3. Through Nucleus, access the InTouch+ platform where the Profile is completed (My Profile tab) (https://nucleus.iaea.org/Pages/InTouchPlus.aspx).
   
   NOTE: The email used for TALEO and Nucleus must be the same. If not, the candidate’s profile will not appear complete.

4. On the InTouch+ platform, under the 'My InTouch+' tab, the candidate needs to:
   
   a. select the institute / organization that he/she works at / represents ('My Institute' section);
   
   b. click on the link called 'Refresh Personal History Form' to update the system, otherwise the nominations submitted will have these fields empty and it will not be possible to evaluate them during the selection of candidates ('IAEA Recruitment Platform' section).

   NOTE: Once the above steps are finalized, the candidate’s profile will appear as completed and he/she can apply for Technical Cooperation events.

5. In the InTouch+ platform (https://intouchplus.iaea.org), in the 'Applications' tab, search by the event number provided in the invitation.

   The help for each step is located at the top of the page. For additional help on how to register, create a profile and apply for an event, please refer to the online guide and training videos available under the following links: how-to guide and training videos. Any issues or queries related to the new system can be addressed to InTouchPlus.Contact-Point@iaea.org or TC-AIPS-PL4.Contact-point@iaea.org.

Should this not be possible, applicants may download the Nomination Form for the TN from the IAEA website https://www.iaea.org/services/technical-cooperation-programme/how-to-participate.

Applications should contain sufficient information to establish that the nominees have the required qualifications. Please note that the information regarding LANGUAGE SKILLS, EDUCATION AND WORK EXPERIENCE is exported from TALEO. If an applicant’s profile in TALEO is not updated, the information in INTOUCH+ for these sections appears as empty and the candidates cannot be evaluated. Completed applications need to be endorsed by the relevant national authority, i.e. the National Liaison Office and submitted through the established official channels.
**Administrative and Financial Arrangements**

Nominating authorities will be informed in due course of the names of the candidates who have been selected, and will at that time be informed of the procedure to be followed with regard to administrative and financial matters.

Selected participants will receive an allowance from the IAEA sufficient to cover their costs of lodging, daily subsistence and miscellaneous expenses. They will also receive either a round-trip air ticket based on the most direct and economical route between the airport nearest their residence and the airport nearest the duty station through the IAEA’s travel agency American Express, or a travel grant, or they will be reimbursed travel by car/bus/train in accordance with IAEA rules for non-staff travel.

**Disclaimer of Liability**

The organizers of the event do not accept liability for the payment of any cost or compensation that may arise from damage to or loss of personal property, or from illness, injury, disability or death of a participant while he/she is travelling to and from or attending the course, and it is clearly understood that each Government, in approving his/her participation, undertakes responsibility for such coverage. Governments would be well advised to take out insurance against these risks.

**Note for female participants**

Any woman engaged by the IAEA for work or training should notify the IAEA on becoming aware that she is pregnant.

The Board of Governors of the IAEA approved new International Basic Safety Standards for Protection against Ionizing Radiation and for the Safety of Radiation Sources. The Standards deal specifically with the occupational exposure conditions of female workers by requiring, inter alia, that a female worker should, on becoming aware that she is pregnant, notify her employer in order that her working conditions may be modified, if necessary. This notification shall not be considered a reason to exclude her from work; however, her working conditions, with respect to occupational exposure shall be adapted with a view to ensuring that her embryo or foetus be afforded the same broad level of protection as required for members of the public.
